### **DETAILED ACTION**

This is the first action relating to serial application number 10/693,561 filed 10-24-2003.

Clams 1-6 are currently pending.

#### ***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "link 68" as in claim 1, line 2, must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Specification***

2. The disclosure is objected to because of the following informalities: In pages 7, line 25, the reference numeral 68 is denoted as the hinges and in page 8, lines 8-9, 68 is denoted a link. Therefore, it is not clear as to whether reference numeral is a link or a hinge.

In page 8, line 28 and page 9, line 3 and 4, the term "lags" should be —legs— prior to "74". Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is not clear as to how each section can be joined via a link.

Claim 2, recites "a link" disposed to link two sections. Therefore, it is not clear if the link of the claim is the same or different to that of the claim 1.

In claims 3 and 4, it is not clear if the "the link" is referring to the link of claim 1 or that of claim 2.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless —

Art Unit: 3682

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by MacDonald et al. (5,647,812). McDonald et al disclose a chain guide tensioner (212) comprising: a plurality of sections (266,268) with each section conjoined together via a link section (unnumbered middle portion of (212) see Fig 9), each of the plurality of sections (266,268) having a partial upper side (unnumbered bottom portion of Fig 9) which forms, in part, an upper side, all of the radial upper side of the plurality of sections (266,268) together form the upper side of the chain guide tensioner (see Fig 9).

In claim 2, a link (unnumbered middle portion, see Fig 9) disposed to link two adjacent sections of the plurality of sections (266,268) together.

in claim 3, the link comprises a pin (col. 7 lines 9-20) disposed to pass through annular openings of adjacent sections (see Fig 9).

In claim 4, note the elastic member (242) associated with the pin (356).

In claim 5, note the first end section (262).

In claim 6, note a second end section (268).

### ***Double Patenting***

7. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

8. Claims 1-6 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claim 1 of copending Application No. 10/693,563. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are obvious variations in breadth and scope.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nanago (4,854,924) and Nakatani et al. (5,779,583) disclose a bicycle chain cover; Moritz (4,672,805), discloses a chain guide; Vahabzadeh et al. (5,180,340) and Weller (1,66,882) discloses a guide tensioner comprising a plurality of sections. Takeda (5,320,582) discloses a chain guide having a plurality of sections. SU (1,004,695) discloses a belt remover comprising a plurality of sections.
